

Biotechnology

- 1 Semester
- East Campus Only

Prerequisite:

- Completion of Biology with a C or above and completion of Algebra I or Double Algebra
- This course can be taken concurrently with Chemistry Sophomore year

Description:

- Biotechnology is an integrated course that is designed to teach both science and technology applications.
- It uses math, biology, and chemistry to design and conduct experiments; collect, analyze, and interpret data; and apply the data to new situations
- Students will demonstrate on-the-job thinking and problem-solving skills through scenario activities which will require summarizing results and troubleshooting errors.
- It is a one semester course (0.5 credit)
